

FY07 Environmental Quality Incentives Program (EQIP) Comprehensive Nutrient Management Plan (CNMP) Payment Schedule - POULTRY

Summary for F07EQIP CNMP Initiative																			
Base Farm number of animals	≤ 100,000	>100,000																	
	Poultry	Poultry																	
NEW Plan/ Operation/ Expansion for 50% animal numbers																			
Animal Unit CNMP	\$1,770	\$2,300																	
Acre CNMP	\$5,170	\$6,730																	
Acre CNMP - Export	\$2,585	\$3,365																	
Definitions																			
New Plan: A CNMP for an operation that did not previously have a CNMP.																			
New Operation: A newly constructed livestock operation with a waste management system.																			
Existing operation with 50% expansion: A livestock operation with a CNMP that increases by 50% or more of the original animal numbers addressed by the existing CNMP.																			
Animal Unit CNMP: The planning activities for the manure and waste handling components of the system. This will be engineering related information.																			
Acre CNMP: The planning activities for the land treatment practices and nutrient management aspects of the system.																			
Acre CNMP - Export: A livestock operation that exports 50% or more of the manure or organic products (including mortalities).																			
Export: Manure or organic material that is transferred to another owner with documentation in written record of transfer.																			
Base Farm number of animals	≤ 100,000	>100,000																	
	Poultry	Poultry																	
Existing Plan Revision for operations that have a plan that is revised. Includes expansion up to 50% of animal numbers																			
Animal Unit CNMP	\$1,240	\$1,610																	
Acre CNMP	\$3,620	\$4,710																	
Acre CNMP - Export	\$1,810	\$2,355																	
Definitions																			
Existing operation with less than 50% expansion: A livestock operation with a CNMP that increases by less than 50% of the original animal numbers addressed by the existing CNMP.																			
Existing Plan Revision: A livestock operation with a CNMP that needs to be revised due to changes in the operation not addressed by the existing CNMP.																			
Animal Unit CNMP: The planning activities for the manure and waste handling components of the system. This will be engineering related information.																			
Acre CNMP: The planning activities for the land treatment practices and nutrient management aspects of the system.																			
Acre CNMP - Export: A livestock operation that exports 50% or more of the manure or organic products (including mortalities).																			
Export: Manure or organic material that is transferred to another owner with documentation in written record of transfer.																			
Instructions for Use																			
The activities associated with the development of a CNMP have been divided into 2 categories																			
Animal Unit CNMP and Acres CNMP (Export CNMP is an option for Acres). The Total Plan includes both categories.																			
Step 1: Locate the Base Farm number of animals that reflects the species and number of animals for the waste management system.																			
Step 2: Follow column to row that corresponds to proper category. Can not include both Acre CNMP and Acre CNMP - Export.																			
Step 3: Select maximum payment for plan. A total plan may be the sum of the Animal Unit CNMP and Acre CNMP payments. Export CNMP is an option instead of Acre CNMP.
